## STUDENT BOOK REVIEW

### *The Green Glass Sea*

by: Ellen Klages

Have you ever wanted to read a warm hearted book that has you crying at one point and laughing at another? Then *The Green Glass Sea* is the book that should be on your list. *The Green Glass Sea* is set during WWII and is based on the struggles of the scientists working with the Manhattan Project. During this time work on 'the gadget' or atomic bomb was top

secret. When the bomb was tested in New Mexico, the scientists were surprised to find a green glass sea. To find out more you have to read the book.
